Software history AutoCAD was the first of the drawing packages to use the concept of the "layer", which is used in other CAD applications. The layer concept allows a drawing to be built up from many smaller drawings, known as "fragments". The layer concept is also used in MasterCAD. The Autodesk engineering director's "Layer Manifesto" was developed to encourage companies to create and use layers instead of large block-based drawings. The functionality of most features of AutoCAD started in 1988, with the release of AutoCAD 2.0 and AutoCAD LT 2.0. With the release of AutoCAD 2000, the interface for AutoCAD was redesigned to a ribbon interface similar to that of Microsoft Office. The ribbon also included a "Launch Pad" (essentially a palette with tool palettes and command palettes) that was used to access and configure features. In 2002, AutoCAD started using more tablet-based operations, such as flip/flop. In 2005, AutoCAD LT introduced AutoCAD LT 2000 which had similar interface to AutoCAD LT 2010. In 2010, AutoCAD was updated to use the .NET Framework and the interface changed to make it more similar to Microsoft Office and Autodesk's other design tools. In 2017, Autodesk released AutoCAD LT 2020, which made some major changes to its user interface. Autodesk introduced the RealView interface into

AutoCAD in 2013, replacing the legacy Windows-based interface with a web-based interface. This was a major redesign, intended to allow users to access the software from any device with a web browser. To improve web-based access, AutoCAD allowed users to download the older legacy Windows-based interface to their desktop to continue using it while using the web-based interface on their mobile device. Graphic user interface AutoCAD has had a number of different interfaces for its software. The current interface for AutoCAD is based on the Microsoft Windows Operating System, where the interface features an 80% overlay of toolbars and menu on a single screen. The GUI can also be configured to use a 100% ribbon interface. AutoCAD has also used a GUI interface based on Windows 3.x and Windows NT 4.0. These interfaces were similar to the original Windows GUI, but with three panes. In the left pane, the user could view the current drawing and create objects. In the center pane a1d647c40b

An Algerian militant group has released a video message demanding an end to the French military operation in Mali, as well as the release of a group of alleged hostages in the Sahara desert. Advertising Read more Daily newsletterReceive essential international news every morning Subscribe French troops have been in Mali for two weeks since launching a military operation against Islamist groups controlling the north of the country. In the short video made by the Group to Support Islam and Muslims in the Sahara (JSIS), the group says it is calling on France to end its "military aggression" in Mali and the release of French hostages it holds. "You are conducting an act of aggression in a Muslim country," the video says. "France, you have four main hostages in the Sahara: two French soldiers and two hostages from Burkina Faso." The JSIS says the five hostages are a French army officer and his family, and two Malians in the Gossi region in the Sahara. "If France wants to claim the interest of Muslims, then it should make a real commitment by establishing a coalition with us to free all these people," the message said. "We do not seek money, we ask only for peace. "France, give up this aggression on the Sahara, release these people and return to the path of freedom." Al Qaeda in the Islamic Maghreb (AQIM) launched an offensive in Mali on January 11. It has called on militants across the Sahel region to rise up and attack French interests. The group also targets Mali's soldiers and civilians. The group has been responsible for a string of deadly attacks in Mali and Burkina Faso. The group was founded by Algerian Islamic militants as a breakaway from Al Qaeda's North African affiliate. The group gained a high profile when it captured 14 Europeans, including French nationals, and Americans in Algeria last November. It demanded a "million-dollar ransom" from their countries
