I tried to do this with the following code: `$nfc = new NFC(); $nfc->registerAction('nfc', 'ac'); $nfc->startRecognition(); $tagId = $nfc->closeTag(); $nfc->startRecognition(); $nfc->closeTag(); $nfc->startRecognition(); $nfc->closeTag(); $nfc->stopRecognition(); $info = $nfc->getRecognizedNfc(0); print_r($info);` This returns an empty array.
