-Create full backups for the entire computer or specific sections -Restore from multiple backup sets (backups are saved for faster recovery) -Automatically backup, restore, and share files between all your computers -Back up all user files, including data, documents, and application settings -Back up single or multiple locations (servers, computers, external hard drives, etc.) -Back up and restore system-related components -Back up music and videos, select items such as pictures, desktop items, etc. -Back up browser favorites, history, desktop shortcuts, and bookmarks -Bulk delete selected files -Export and import backup reports -Manage settings and security options for all backup jobs -Encrypt all files and folders with a military-grade 256-bit AES encryption -Protect against external threats with a firewall -Create and restore bootable media -Create and restore system and USB boot disks -Backup and restore all Windows systems (including Windows 7, Windows 8.1, and Windows Server 2008R2 and later) -Backup and restore Mac systems (10.5 and later) -Back up the latest Windows 10 upgrade

IBackup can back up your PC's data and restore it in case of accidental deletion. You can securely save all your documents and other important files in a few seconds. And thanks to its interface, you can perform backup of your system and save your favorite files and folders directly in your IBackup account. Simple as you can possibly imagine, but to be able to play the backups are much easier. Windows 7 Windows 8 With the newly acquired Microsoft Office 365 subscription, Microsoft keeps insisting that you're already included in the user group of Office 365 Enterprise E3 plan. And all your files can be backed up easily by using Microsoft OneDrive. Using this cloud service, you can store all your files in OneDrive and sync them easily to your device. IBackup is an effective and powerful cloud-based file management software. This Windows backup tool is capable of protecting your entire system by creating backups on a regular basis. In general, to do a file backup we can use two methods, using Windows Operating System Backup utilities or through cloud storage providers. Though creating the backup files is simple enough, using a file backup utility is the most popular way of backing up Windows Operating System files. However, this method requires a separate PC, and is

Key Macro for PowerArchiver offers you to control, edit, insert, and remove text macros from different sections of the file. It allows you to easily create macros, edit and insert text, images and videos into PowerArchiver. This tool supports ANSI, Unicode, UTF-16, UTF-8, HTML and Rich Text files. It is not compatible with Zip and RAR archives. It can convert between all formats supported by PowerArchiver
