ListParts Crack Free

[Download](#)

ListParts is a simple yet powerful application that is designed to discover hidden partitions on your computer. This unique utility scans your HDD searching for hidden partitions, the number of which may vary from 1 to a handful! It will also help you to fix any problems that may have been caused by such hidden partitions, and to free up any space occupied by them. You will be guided through the entire process step by step and will receive detailed information about each process that takes place. What is new in official ListParts release version? What is new in version 2.0.4? • Number of available hidden partitions could increase. • Ability to connect to a remote computer and to send commands for that PC. • Ability to store all information for further processing. • Support for self-extracting archives. • Ability to search for and locate hidden partitions not only on primary IDE hard disk drives, but also on RAID 0, RAID 1, SCSI, etc. • Ability to remove hard disk partitions. ListParts Main Features: • Ability to search for and locate hidden partitions on all available hard disk drives. • Ability to search for, remove, and relocate partitions. • Ability to run a clean re-installation of your system. • Analyze partition structures for existing, hidden partitions on your PC. • Ability to fix any issues that may arise with hidden partitions. • Ability to write a list of partitions that can be processed with the help of 'Fix' menu option. • Ability to view all information and statistics on partitions that were discovered. • Ability to view BCD and BOK information on each found partition. • Ability to connect to a remote computer and to send commands for that PC. • Ability to send the list of detected partitions in its raw format and to save the raw file for further processing. • Ability to save all detected partitions in a text file for later usage. • Ability to run a clean re-installation of your system. • Ability to fix any issues that may arise with hidden partitions and to remove their files on the system. • Ability to run a clean re-installation of your system. • Ability to fix any issues that may arise with hidden partitions on the system. • Ability to remove hidden partitions. • Ability to analyze the structure of found partitions. • Ability to view all information and statistics on partitions that were detected. • Ability to save

ListParts is a very simple yet effective piece of software that was created to provide you with the means of inventorizing your hard disk partitions, enabling you to find out if there are any hidden drives, possibly created by rootkit infections. Clear-cut and straightforward usage While the application comes with a fairly basic and minimalistic appearance, its strength lies not in its GUI, but in its functionality. The interface of ListParts consists of a compact, non-adjustable window which only comprises two buttons, specifically 'Scan' and 'Fix', also featuring the option to 'List BCD'. Find hidden partitions and fix any found problems with a button press This program is mainly aimed at people who wish to determine if there are any hidden partitions on their hard drive, particularly those created by a rootkit infection, without your knowledge. Whilst its initial usage is fairly undemanding, interpreting the data it returns may require additional expertise. For starters, you can choose whether to 'List BCD', (Boot Configuration Data), then click on the 'Scan' button and allow ListParts to fully analyse your system. The duration of this task can vary, but once complete, a TXT report is generated, enabling you to learn various information about your PC's memory

and partitions. Evidently, the results depend greatly from one PC to another, and should be interpreted by an expert, who can determine whether there are any problems, then create a 'Fix.txt' file for you to run with the help of ListParts, in order to remove the issue. A helpful hidden partition finder To sum it up, ListParts is a useful utility that can assist you in learning if your system has been infected by malware which created hidden partitions on your computer, allowing you to resolve the problem with professional help.
