ResCarta Tools Crack+ Torrent (Activation Code) [32/64bit] [Updated]

- Data Format Update is a small but efficient program that offers two great features: it updates the metadata of any document with specified 'faulty' data or converts existing data into a new format. - Metadata Creation lets a user enter the information necessary for publication, such as title, author and keywords, and creates a standard index file for the document. - Data Conversion translates any file into any other format (TIFF, JPEG, MP3,...) if the creator of the original file specified an encoding application. - Textual Metadata Editor is a full-featured text editor that lets the user enter, view and edit a document's metadata. - Audio Transcription Editor is a powerful software that transcribes audio files, as well as reads and outputs voice-over messages. - Collections Manager is a powerful tool that allows user to create and store folders and sub-folders for document storage. - Indexer automatically indexes every digital document, and the resulting information can be extracted into a database using either the built-in SQL or any third-party database. - Checksum Verification Tool lets users verify the integrity of a given file. - Import Existing File Converter is a free program that offers users to import any file into a desired format. - Automatically Converting PDF files for better display quality Why spend an entire afternoon to get your PDF documents ready for printing, when you can employ the handy free tool that automates the entire process for you in a single click? This small utility allows a user to automatically open, convert and save a PDF file in whatever format they wish (e.g. Windows XP, Windows 7 or Windows 8). The program works on both 32-bit and 64-bit PCs. ResCarta PDF Converter Description: - Convert PDF files into files of any other format, including DOC, PPT, JPG, TIFF, GIF, DOCX, XLS, XLSX, TXT, ZIP, or any other format the creator of the original file specified. - Create a new directory to store the converted file and let the user select the directory for its own content or select "All Drives" to automatically upload to every folder. - Extract text from PDF files - Automatically convert PDF files and save their converted versions into any desired format. - Automatically create a backup copy of the original file. - Automatically verify the integrity of the PDF file. - Automatically generate

Zip Archive An archive file is a file containing a collection of other files. For example, an image file is an archive file. A zip file is a zip archive. ResCarta Tools provides two types of zip tools: one for creating zip archives, the other for extracting zip archives. Data Format Update Data Format Update (DFU) is a utility that makes it easy to determine whether a file contains corrupt data. This tool reads a binary image of the file, and converts the image to text for searching. When a binary image file contains no data (i.e. is empty) or contains text but its characters cannot be read (i.e. contain errors), DFU identifies the file as corrupted. Textual Metadata Editor Metadata is data about data. For example, the author of a document is the metadata for the document, and the document type is the metadata for the metadata. This tool allows you to modify the metadata for one or more existing document types. The tool can search for multiple metadata keys in a single document type. Audio Transcription Editor Audio Transcription Editor (AT) is a utility that lets you modify the audio content of an existing document, such as a CD or a video. AT is most commonly used to identify the audio content in an unknown audio file. AT can identify a single file or a collection of audio files. Collections Manager Collections Manager (CM) is a tool that allows you to easily manage collections of documents, such as an archive of newspaper articles. CM provides a user interface that can be displayed as a browser window on the Internet. CM also provides a Web site that can be used to display the collection. Indexer The Indexer tool is a utility that can read a document and add a structured index to it. You can use the index for searching the document. Indexes can contain metadata, and can be used to reference a document without making
