Photoshop Lightroom is an add-on for the digital photo library and offers advanced features for modifying and organizing your images. This is the paid version of Photoshop Elements and it costs \$99 per year or \$49 per year for the first year and \$69 per year thereafter. Your first option is to use either version of Photoshop Elements. With a little practice, you'll be comfortable with it in no time. How does Photoshop Elements work? Like other image editing programs, Photoshop Elements allows you to edit images by using a variety of tools and adjustment layers. The different tools and adjustment layers are organized into panels, just like in Photoshop. They are accessed with tabs at the top of the screen and can be dragged into new positions. You'll use tabs at the top of the screen to organize the various tools and adjustment layers. When you open Photoshop Elements, the three main panels will be displayed in a small preview window, just below the program's main interface. The three main panels, located on the bottom of the Photoshop Elements window, are Favorites, Media and Workspace. The Top Panel The Top panel, labeled Favorites, will display the panels that contain the tools and adjustment layers you use frequently and that you frequently switch between. It has three main features: The Home tab. In the Home tab, you can access the panels with the tools you use most. The Favorites, Media and Workspace tabs are accessible from the Home tab. Some simple pen tool settings that can be done in Photoshop: Brush Spike Type If you've worked in Adobe Illustrator, then you know that the pen tool lets you draw shapes and edit text in a similar fashion to the old Illustrator tools. There are three main categories of pen tool layers: paths, shapes, and text. In Photoshop, you can draw, delete, and edit text using the pen tool. In this short tutorial, you will learn how to use this tool in Photoshop to make your text creative, unique, and stylish. Creating a Graphite Text Effect The first step is to create a text layer. Go to Layer > New > Text Layer > and use a font that you want to edit. You can download fresh fonts using the Download button. Next, you'll edit the text layer. Go to Edit > Text > Glyphs. At the Glyphs panel, drag the text layer to the Glyphs panel. Select the Brush panel and choose Graphite Glow from the Transparency drop-down. To change the color of the glow, click in the color box, and pick a new color. Click OK. Go to Layer > Layer Style > Inner Glow > and change the angle and intensity. To create the dark-grey color, click the middle color box and pick a lighter gray. To create the text color, click the color box, and then choose a color from the Fill box. Go to File > Save and select Photoshop Format > and you can select the Final File Size. Create a New Layer In order to transform the text layer, you will need to duplicate it. In Photoshop, this is done using Ctrl + Click. Go to Edit > Duplicate Layer, and select the option Keep Source. Move the text layer and the duplicate text layer to separate layers. Then, go to Edit > Transform > Flip Horizontal. To add a drop shadow, you will need to duplicate the text layer again. Go to Edit > Copy > then move the text layer to another area of the document. In the new text layer, make sure you select the shadow option on the Layers panel. This will take you to the Shadow panel. Now, go to Edit > Stroke and make a black stroke. Then, you can go to Effects > Blur > Gaussian Blur > and make the width to 40 pixels. Make sure you have the Lighten the fog and S
