There, he worked on a project involving a new graphic editor called Potluck. Potluck was the toolmaker used by Tony Wong at the time to write Potluck (which is a very cool name!). To me, as a non-native speaker, this implies that the previous writing was bad. On the other hand, I've heard native speakers pronounce this word in two different ways: A very simple example, "I'm going to be on the garden." Here, "on" is a preposition and can be moved to the end: "I'm going to the garden." I actually think that my examples of "as if" and "as" don't really show this word, since we normally use "as" as a conjunction, but that's another issue! In the Middle English version of the Bible, you will find the word "sod" for "sodom." It derives from the Old English "soded," which is also how we get "quoted" in "Let every man be persuaded in his own mind." We used a recent update to the Microsoft Store app on Android to record the video and it only took a few minutes. We also used a computer to edit the video. Even though I am a developer, it was not too complex, just a few plugins and some basic editing. Since the title says it is my phone, the phone is a Samsung Galaxy Note 8, and the software is Android 10. There are a number of ways to download a video from my phone, including the Microsoft Store app, SnapChat, iMessage, YouTube, or any of the third party sites I have linked to. As a security measure, you may want to download the file to your computer and then upload it to YouTube from there. Just be careful with that step, especially if you are recording video with your phone in case you forget about what you are doing and it is not saved properly. If you wish to reproduce the video, I will supply the URL in the description.
