“Ages have passed, seasons have changed. But the bond between Marcus and Rosemary remains pure. Meanwhile, Tetrine is still a scrivener, and still trying to become a good one. She dreams of the day when she makes her city proud by winning the Fiedate and glorifying her town. But even in this deep winter when she should be safe from the deadly virus, the symptoms of a curse are brewing. From the shadows emerge the demons, and it is up to her to see the world for what it is. To guide her city through the hardships of war and the coldest, darkest winter it's ever seen. To love Marcus and Rosemary, who are finally all she has ever desired, but must know their love will come at a terrible price.” Features: Over 50 fusions to discover, with new ones, every time you play Six special endings, each with its own conclusion. All of them true, some humorous, some tragic, all valid! Unique story and mechanics: Vote at every intersection of points; don't hesitate to choose the direction you want to play! Interactive dialogue, conversations, and journal entries. The text can be skipped, if you choose to! A huge focus on immersion: If you ever wish to skip a puzzle or just a bit more of the story, click a button. The controls are hidden, and will not be visible as soon as you skip a chapter. Did you remember to search for the lock on the door? I might as well mention this before I continue on with the review: I played Winter's Trumpet for the first time on PC and I won't be mentioning any changes that are specific to a particular platform. I think the story can be summarized very nicely by saying that I loved and was surprised by how much I loved the writing in this game. I just devoured it as if it was a delicious novel. You get sucked in and keep trying to find out what happens next. The characters were also really well done. Many of them I had never heard of before playing this game, but it only made them more unique. We had 16 main characters in this game, and each one of them was fresh and interesting. From the main characters, to the many NPCs, to the interesting events that you can witness, everyone's story was captivating.

There are a lot of bugs in this game and they're buggy. For instance, let me give you a short list of the weirdest things I've experienced since playing Fobia and that's not even talking about bugs that are fixed or issues people have mentioned:

- You can't enter the second floor of the hotel while the proprietor is asleep in his house.
- Only one copy of you can wander around the hotel at a time, if you open the game in some form or fashion and walk away from it, you can't come back to the game and find your avatar still wandering around.
- There is an entire floor of hotel employees (doctors, maids, waiters, etc) wandering around. Most will just stand there and stare at you.
- A lot of the men in the hotel have dead wives.
- Even after going to the second floor and meeting the woman who wants to join you in bed, there is no actual sex in the game. When you finally get in bed with her, it's like you actually bang her for the first time, yet you don't get the standard O.o rating for it. It has to be the weirdest sex scene I've experienced in a game.
- You can't watch a video while you are in bed with a woman. If you try to click play on the "video room" in the hotel lobby, it says that the video library isn't available, you can't enter it, and when you press play on the video, it actually begins playing and the screen goes black and a message comes up saying the movie has started.
- When a second man shows up in the hotel and

begins pursuing you, he'll send a message to the first man and the second man will wait in the lobby for a bit. At this point, the first man will run into the lobby and start pursuing you and the second man will start stalking you too.- At the beginning of the game, your avatar stands out as female. But once you get to a part of the game where your man encounters the woman he is supposed to spend the rest of the game with, your man will start seeming like a woman and will begin wearing dresses and such.- The woman's husband will wander into your hotel room while you are in the middle of sex with her, and enter the game. At this point, the woman won't complain about his intrusion, she will actually make out with the guy instead.- The employees in the hotel also have realistic pornographic poses with
