If you're looking for the next Best of Theme song/BGM Pack that we're now a day proud to share with all of you. Come and get a next generation's content - make sure you get this! This BGM pack is devoted to our favorite series - Karugamo. We decided to make a package that will show different sides of this beautiful quartet from time to time. Starting with the first track, which creates an atmosphere similar to a sour-tasting kombucha drink (and you thought "sour" is a bad taste) - the track "Gukai no Kombucha" by Koi. This whimsical track will make you feel like drinking some kombucha. The second track - Sensei - brings you back to earth. The girls in this pack are very sensible and two of them have the future ambition to become teachers. This track will make you glad for all of their efforts. If you wanna hear the full version - read on. Please consider buying the bundle package. The track is already included in your purchase. The second track is connected to the Karugamo guys very strongly. This track was the second choice of Koi after the first track. According to the editorial department of Anqiang(JOG) - the assistant composer - who personally used to be a teacher too (of the "non-mainstream" track mentioned before). The first track is a nostalgic one - the track called Sensei. In the past, the song was registered as a part of another track. But Koi (you should know the composer in this series by now) decided to change the track from a certain track from the previous version. This track is sometimes known as "Kamoshita" - "sad, small, sad" in Japanese. The track "Kamoshita" should probably make you feel something like an "animal who is taken to another location via train". You should fully feel a nostalgia time with your friends. In the sense, everything is sweet, as if you've gone back to your school days again... The melody reminds you of being in the kindergarten classroom. Koi composed the sound that will embody the seal of "Sensei" or "technician teacher". The Instrument is character played by SOUND GUITAR on the track "Geneviève" by Claude Debussy. The track "Gukai

no Kombucha". I'm sure that

Q: Is it possible to use a single shared library among multiple applications in C++? I know it is possible to use a shared library among multiple applications in many languages, and use one object from multiple applications. I need to know if this is possible for C++. I am creating multiple applications using Qt Creator. A: It is possible: From CMake wiki: You will need to create a CMake file for your project and set the library search paths. I'm too lazy to paste the example cmake file so here is the search paths for the qt core searches include(cmake/utils/CTest.cmake) find_package(Qt5 COMPONENTS Core) add_subdirectory(YourProject/FileA) add_subdirectory(YourProject/FileB) if (Qt5Core_FOUND) find_library(FileA_LIBS NAMES fileA PATHS ${QT_LIBRARY_
