(film) **Outworlder** is a 2004 musical-comedy science fiction film, directed by Tim Kirk and starring Keira Knightley, Jude Law, William Hurt, Derek Jacobi, Chiwetel Ejiofor, Johanna Marquet, Stephen Tate and Edgar Ramirez. It was adapted from the 1995 novel of the same name by Thomas M. Disch. Plot Soldiers from an unnamed country discover the body of a young woman whose skin has been peeled off. They determine that the only thing with any notable amount of flesh, is an implant inside her brain. They clone the implant and are able to see the girl move and interact without any sense of discomfort. Eventually her clones are all "reprogrammed" to be more docile and obedient. The gangrenous girl's creators, New Zealand scientists have dubbed her "Kate", as she continues to refuse to follow their rules, after they rebel and killed the initial researchers of Kate. Kate is put to work as a picker for a low-paid meat company, much as the clones are for the meat company clones. Company and human clones live harmoniously and the clones and humans are integrated into a single society of sorts. In due course the clones begin to show signs of stress from missing their homelands, get sick and rejected for pregnancy or sexual relations. Considered "infected", the company clones are incinerated, along with the infected humans. Kate climbs the slaughterhouse food chain, enjoying casual sex, a few minor confrontations, and financial prosperity. She starts living in a new home of her own design. One day she discovers that she is pregnant. It is thought that Kate is so low in the food chain due to the implant she is sterile. She flees the facility and collapses. The urn containing the ashes of the original young woman is broken open and Anna's body is revealed. Kate has taken another job at a lab, where she repeats her experiment. Her clones are delighted to see her again. There is an argument between her and the clone she had made from the corpse. She explained that an embryo that she accidentally conceived was a boy and because of her DNA structure, she is prone to need long periods of alone time to think. Her clone suggests to her that if there is a girl, she would still have some way of being around people. She remembers hearing about women cloning themselves for fun, and wonders if women are more fun. She and the clone break through with a breakthrough
