What is your goal in life? Is it to have everything you need? Or is it to have as much as you want? That is the question one needs to ask oneself if they really want to become wealthy. Do you want more money? And do you want more people's respect? No matter what you want to win, winning requires preparation. Read more for tips on preparing to win. I bought a used Grand Am touring car in the early 1970s and I'd love to find a "rebuilt one" today. Its a standard E27 headlight (small bulbs) and I have one that's in the brackets and one that sits directly next to it. The roof structure on my custom made low buck frame is solid. My DIY with woodworking tools and with a little bit of welding and fabrication was coming up a bit short. I was going to modify the tank in the picture to be a hold tank and just fill the fuel tank to the brim with fuel. The item regarding the scuba tanks was mentioned in this thread before. This really deserves to be a whole thread on its own. With that said, I would consider a scuba tank only if it meets two criteria: ease of adjusting and ease of filling. Here are some of the posts on scuba tanks: How to build a scuba tank Diving mask with scuba tank holder Shark tank on scuba tank Is this scuba tank "circuit"? Custom built scuba tank Concrete scuba tank Construction of plastic scuba tank Gas tanks on scuba tanks Pvc scuba tank Tank assembly like a pro Hey all, I have a little problem. I have been searching online about buying a remote gas for a hedgehog. But no one has good high rez pictures available. I don't want just to buy one off the shelf and take the tank off so I can look at it. I want a remote gas that will make a hedgehog happy. I have a personal set up but I can't take it home because they have my name on them and I don't want to be fined. Any one else need to have a remote gas for a hedgehog. One that is adjustable and I can take to shows? thanks, TOTM Kills 2 and 2 for either side. I start pointing either side at the inlet only and let it run for 20 or 30 seconds. This usually knocks off
