# YouTube Video Commenter is an intuitive program that allows you to automate the process of posting comments on YouTube. The tool offers a suitable method for promoting your business, your work or other aspects, by posting your website address to videos from the same field. You may easily personalize the messages you post. Post batch comments, avoid spam filters YouTube Video Commenter allows you to post comments to hundreds of targeted videos on YouTube, in order to promote your business or send a public message. The program allows you to filter the targeted videos, with the help of keywords, in order to work in a specific niche market. You may thus comment on related videos and avoid the powerful spam filters sustained by YouTube. Moreover, you can customize the message you wish to post and insert random wildcards. The program also features built-in spam protection, which allows you to post comments without being targeted by the spam robots. Wildcards and video limits YouTube Video Commenter requires that you enter your YouTube username, so others can identify you on the website and your login credentials. Moreover, it supports the addition of wildcards, random strings of characters, designed to help you avoid spam filters. The program allows you to set several parameters, such as the time interval between posts or the maximum number of videos that you wish to comment on. You may narrow down the list of videos, by entering the desired keywords, as well as establish a pause between posts. This action is also a spam protection method. Friendly application that supports proxies YouTube Video Commenter supports the use of proxy servers, in order to comment anonymously. All you need to do is enable the proxy use, insert the address and the desired port. This user-friendly application features tooltips for most of its fields, notifying you about the required type of data or why it is needed. # YouTube Video Commenter is an intuitive program that allows you to automate the process of posting comments on YouTube. ## YouTube Video Commenter License Key Full

You can receive up to 10,000 comments for free on videos. If you want more, you can also order packages of up to 50,000 comments per month. We offer a software program that can watch YouTube videos, let your comments fly, and track its effectiveness. The software automatically populates YouTube comments. Record detailed statistics about the comments that are received. The results of the comments, both positive and negative, are presented in detail, along with the statistics. No need for JavaScript or Flash Player. Video Commenter Pro is a standalone software and does not require the use of a web browser. Free. The paid version is \$39.95. I have had a chance to use this product and will be ordering it. December 21, 2009 It works as far as the comment system goes. It seems to work well if you're not extremely busy. It is fast and I have no reason to complain. November 20, 2009 Worked as intended. Great! October 20, 2009 This product almost worked as it should have. However, it was supposed to be a web browser plug-in so I couldn't get it to work in Firefox. It did work in Chrome. It also never worked in IE. My contacts with Tech Support over several months never got me a straight answer or a resolution. So, I regret buying it. I'm having a lot of trouble getting rid of it. I've spent hundreds of dollars already trying to get it to work and it never does. October 20, 2009 Wonderful!!!! October 18, 2009 I have been using this for a few weeks. With that said, there have been some issues. 1. If you delete the comments that have been done by an individual user, they automatically re-appear in a few minutes in a random order. It is sort of like they are always with you and you can only chose to delete them. I have already created a support ticket with Tech Support to understand if there is a setting that I missed and they never responded. 2. It randomly clicks on the down arrow button next to the comment and deletes the comment (even though it is already deleted.) There seems to be no way to stop this without creating a support ticket. 3. I am having difficulty making comments with it. I tried repeatedly and it just doesn't seem to want to work. It just stops, is there is no response after several attempts
