AutoCAD is used for 2D vector graphics, sectioning, 3D modeling, 2D drafting, creating and editing engineering drawings, illustration, and 3D engineering. It has many tools for viewing, editing, importing and exporting data. AutoCAD is considered as a professional software in the field of Engineering. If you use AutoCAD, you can create architectural plans and design buildings, bridges, roads and tunnels. You can design mechanical parts like components, valves, and motor components. In addition, you can draw sections, blocks, and interiors. You can create plant diagrams. With AutoCAD you can create a 3D model of an object and rotate, scale, move, and edit it. In fact, AutoCAD helps you create 2D plans and 3D designs to create buildings, bridges, and tunnels. You can plan all kinds of buildings, such as residential, commercial, office, and industrial buildings. You can make the most of the features of AutoCAD and plan residential, commercial, and industrial buildings. Now, the California State University and California Community College systems are taking that equity plan to the next level with a groundbreaking $15.4 million equity-focused institution. The creation of The California State University and California Community College Equity Initiative – or Cal State Equity – is a step toward finally improving the outcomes of black and Latino students, as well as other historically underrepresented student groups, across the University of California and California State University systems. "Black and Latino students are more likely to drop out of community college than students from any other group," said Cal State Equity Associate Vice Chancellor for Equity, Diversity, and Inclusion, Joan K. Ashworth. "We must make sure that students from these groups, and all students, have the resources and access they need to succeed in college." Cal State Equity supports community colleges in preparing students for transfer to the University of California and California State University. The campus has five sites in Sacramento, San Diego, Riverside, Bakersfield and San Bernardino, and will be developing more. Cal State's campus in San Bernardino, which was part of the new initiative, recently received $7.5 million from the UC Office of the President to support its equity efforts, including recruiting, developing programs and creating a model curriculum for courses that will better prepare students for transfer to the University of California. The campus will offer eight courses that will be taught by faculty and community members from the San Bernardino community. "Initiatives like Cal State Equity will bring promising students from underserved communities to university programs and will strengthen those programs by bringing those instructors into the community," Ashworth said. "We know that black

and Latino students are often the first in their families to pursue college, and that less than 40 percent of black and Latino students graduate from community college within six years." Community colleges are often the entry point into higher education for students of color, and Cal State Equity will focus on ways to improve retention and success of students of color at all ca3bfb1094

Project Bina48, a big-money development of the robotic brain-on-a-chip, has been unveiled by a team of researchers at the Massachusetts Institute of Technology and the Harvard University. The system, which was described Tuesday in the journal Science, combines multiple networks of neurons on a computer chip to mimic the function of a brain and is about 100 times the size of the one used in a previous generation of brain chip. "We've managed to gain more brainpower than the human brain," Dr. Rudy Rettner, one of the researchers on the project, said in a telephone interview. The human brain is estimated to contain about 100 billion neurons, or nerve cells, each with hundreds of connections. The device

What's New in the AutoCAD?

Autocad Mechanical Data: Define 3D mechanical components using a design language and allow them to automatically appear in your drawings. Design information is gathered from industry standards, 2D plans, and 3D models. (video: 3:24 min.) Cloud-based Services and Enterprise Options Install and use the cloud-based services in AutoCAD and provide a powerful workflow solution for your entire organization. AutoCAD subscriptions include a variety of enterprise-level options. (video: 3:37 min.) Extensions: Extend your drawing and annotation tools to create custom solutions for your workflow. Take advantage of built-in functionality and get started with a single click. (video: 2:07 min.) AutoCAD Extensions: Release the power of the drawing engine and gain insight into changes in your drawing. (video: 2:39 min.) When it comes to AutoCAD, it's the little things that make the difference. See for yourself with what's new in AutoCAD 2023, starting January 1, 2018. Streamline Your Projects with AutoCAD The AutoCAD 2023 release introduces AutoLISP. AutoLISP gives you an easy way to create powerful macros that automate time-consuming tasks. Just add a few lines of code to a macro to create custom commands and make commands even more powerful. Macros can be triggered by drawing actions and events. They can also read data from a drawing, transfer data to other drawings, and modify data in a drawing. AutoCAD is the world's most widely used 2D drafting software. Thanks to the AutoLISP command set, your macros can make drawing easier and even more fun. AutoLISP-based Commands Export your drawings to other applications. Use AutoLISP commands to create what were previously called shapefiles. Create a.DWG file, a.DWG-XML file, a.DXF file, or a.DXF-HTML file from your drawing. Export the file directly to a range of popular formats, including Microsoft Office® formats, to make it easier to publish your drawing. Save the file in a specific folder or have it automatically placed into a specific folder. Import from PowerPoint®. Use AutoLISP to import drawings created in PowerPoint®. You can import drawings that contain a wide range of objects and
