You play this turn-based, puzzle-like strategy game as a rabbit named "Hop". Your opponent is "Skip". The object of the game is to jump around on the game board, score points, and beat Skip. Also on the board are playful creatures called "Thump". Some move about randomly while others actively try to block your moves. Beware the red Thump. If they touch you, you are thumped and lose a turn. To play well, you must account for Skip and the Thump sprites so that you avoid being blocked or forced into bad moves. And do not pass up the opportunity to earn the 10 bonus points when you meet a color objective. Whimsical Strategy-Puzzle game. Fun for any age. In The Revenant: The Road to Revenge, a gritty, realistic and profoundly emotional revenge fantasy narrative, you take on the role of a disgraced ronin who fights alone. An enemy with no honor, you will pursue your enemies' leader, a woman whose crimes once called for justice and whose sacrifice brought misery to the land. You now live in exile in a distant mountain village, far from the war and its violence. There, you will not make peace with your past - you will avenge it. What We've Been Up to - We are excited to be in an active development with this game! In the past few months, we have made a huge push towards completing this project. We are working hard to ensure that this game is finished and polished as much as possible. In the meantime, we have been playtesting and responding to fan feedback, making a lot of small updates. We're using a kickstarter campaign to fund the game, because we need enough money to promote the game. There are a lot of things that still need to be done (like localization and playtesting the game with an international audience), but we want to make sure that the game is as professional as possible! We are currently only available on Windows 10 devices, and the game is in the final phase of development, so it will not be available on other platforms at launch. Our goal is to publish the game in 2021, at the end of 2020, we have been in a private beta test for months, so we know that the game is good to go! We appreciate all of the support, the community has been incredibly supportive! Thanks everyone! Defending the Real-Time Battle System When battling as Kasumi, you’ll see a dramatic, sexy, and extravagant scene as you take down the enemies with a large array of weapons and equipment! In the real-time battle system, your Witch costume is your key weapon. Attack and use various weapons, and then use the combat skills of your costume to decimate the enemies. Finally, the types of enemies will differ. Be sure to enjoy the different cast of enemies as you deal and take down enemies with different armor and weapons! Cover Attack and Chain Skills!
