Scribble is an absolute blast, but is also a lot of fun. You play the game with your family, with all of them knowing different letters, and then you take turns, spelling silly words and creating fun and silly drawings. “Prepare to be a wacky word wizard!” The game comes with a colorful box in which you will play with your family, in which you can sketch letters, turn on the microphone to test your words, and perform silly songs. The game comes with a bright and fun colouring book and six stickers. The stickers can be applied to the book, making it look like one of the characters from Scribble. Who Should Play This Game: Everybody! Scribble will bring a lot of fun and laughter into everybody’s home. Who Should Not Play This Game: No users with toddlers. About The Author: Marc Molasky - Marc has been the lead reviewer for Nintendo Life for over 5 years. He is also an established video game website, having been running games-related websites since 2001. He reviews all types of video games and keeps up to date with the latest releases. Cool concept, but not a very good game Reviewed by : Pedro, on the 09th of October, 2012 Rating: 6/10 Scribble is a nice simple concept, and it isn't without its charms, but it suffers from too many problems. The biggest one is its logic, or lack thereof. In Scribble, you are given a single block and have to create words. Throughout the game, you collect other blocks to provide you with new words, including diacritics and more. However, the game never indicates which letters should be on which block. It is possible to get the majority of the letters you need from the initial blocks, but it is far from a guarantee. Even with a perfect knowledge of the original blocks, the failure to complete the puzzle is frustrating and leaves you unable to enjoy the game as intended. Another problem is the level of difficulty. The game is just too easy, something that I and a number of my friends highlighted. There is no way to gain a hard enough version of the game that you have to work to understand. Games like Bejeweled are far more challenging because you can't make new blocks, and the game's level of difficulty increases the longer you play. In Scribble, you are essentially only collecting blocks to create words. There are also c9d1549cdd
