Six new stars have been added to the 2012 line-up for the Stanley Cup playoffs: Colorado, Minnesota, Los Angeles, Philadelphia, New York Rangers and New Jersey. It's not an ideal group for any of them, but of the six it's the Philadelphia Flyers who can make the most claim to a position in the bracket. The downside is that all four lower seed teams (including the second-best team in the Western Conference) are at least .500, and the Flyers are 5-9-2 against that group. As a result the Flyers need to play better than a sub-.500 team in their remaining two games in order to maximize their odds of reaching the postseason, which is not a given. At the same time, they would need a miracle to reach the conference final. The Flyers are .500 vs. the Presidents' Trophy-winning New York Rangers; that's it. The Flyers have been able to secure a home-ice advantage in the first round by beating the Rangers in the regular-season finale for the second straight year, and have built up a 1-0 record against the Minnesota Wild (who are in the Western Conference as a wild-card entry). If the Flyers were to face the Wild, they wouldn't have a leg to stand on, as the Wild

would be 3-0 at home. If the Flyers were to face the Wild, they would have to play at least three games in a row on the road, and could be forced to play the Colorado Avalanche first, then travel back to the O2 Arena, then d41b202975
