What's New in the?

Sample Browser Visual Studio Extension is an Extension for Visual Studio 2010 and newer that lets you browse the Code Samples from the MSDN Samples Gallery. The tool allows you to browse and search the list of samples from a specific folder and also downloads the samples into the selected location. If you wish to download the samples to use them for learning purposes or to test them in your projects you can do so by right clicking on them and select the download option. The download option will copy the selected samples to a specific location and it will retain the structure of the original folder. Note: For downloading the samples, it is recommended that you do not use anonymous user accounts on the system. Sample Browser Visual Studio Extension Requirements: If you want to use this extension you need to have Visual Studio 2010 or newer installed on your system. Source Code: Sunday, September 12, 2015 This Extension adds a new UI element called Data Flow Editor for UWP applications. It contains a new editor for the declarative XAML data binding syntax. The XAML data binding syntax was introduced by the Windows Runtime and this extension enables you to edit it in a text editor like Visual Studio. The extension also includes a new sample that shows how to create new Data Flow triggers, Data Flow effects, and Data Flow values. This sample is available for both the UWP project and Windows store project. It will also show how to use the Data Flow Editor to edit the advanced XAML data binding syntax. Sunday, September 5, 2015 This Extension lets you easily build multi-platform applications which use both Windows Store Apps and Windows Phone Apps. This extension makes it easy for you to use the Windows Phone 8.1 project templates in Visual Studio for Windows Store Apps. You can use this extension to create Windows Store applications that uses the services, control, and capabilities of Windows 8.1. This means that you will be able to share code between your Windows Phone 8.1 projects and your Windows Store applications. Sunday, August 27, 2015 This Extension helps you to create Windows Phone 8.1 APIs and New API's for Windows Store Apps. This extension supports both Windows Phone 8.1 App and Windows Store Apps. It also helps you to compile the code into a dll that will be accessible to both the Windows Store Apps and Windows Phone 8.1 Apps. Monday, August 14
