A comparative study of the efficiency of the enzyme immunoassay (EIA) and the immunodiffusion (ID) in the detection of infections caused by the causative agents of strangles in cattle and pleuropneumonia in swine was conducted. It was found that the sensitivity of the EIA was 4 times as high as that of the ID technique for the identification of the causative agent of strangles and 4.5 times as high as that of the ID technique for the identification of the causative agent of pleuropneumonia. The EIA technique is considered to be equally effective for the serodiagnosis of listeriosis, brucellosis, paratuberculosis, leptospirosis, and the serological diagnosis of cysticercosis, fasciolosis, and neosporosis.Q: C# dynamic array not populating So I have the following code and I'm trying to learn about dynamic arrays so I can use them. The goal of the code is to read in a CSV and parse out each "row" into an int array. The CSV looks like this: 0,5,5,7,0,0,0,8,0 0,5,5,7,0,0,0,8,0 0,5,5,7,0,0,0,8,0 0,5,5,7,0,0,0,8,0 0,5,5,7,0,0,0,8,0 0,5,5,7,0,0,0,8,0 0,5,5,7,0,0,0,8,0 0,5,5,7,0,0,0, c6a93da74d
