humble bundle - best known for their software bundles, they also offer bundles of hardware. for example, the "humble bundle for android" gives you a ton of free apps for your android phone or tablet. similar to the adobe/mac bundle, these bundles are usually around \$20. my personal favorite is their "humble bundle for ios" bundle. it is \$10 for the iphone/ipad, and contains apps for the iphone/ipad and mac. it's my go-to bundle when i'm looking to purchase apps. if you don't have an ios device, i recommend the bundle for android.

steam - steam is a great way to play games. it has a decent selection of games (most of which are free), and allows you to download and play them for no charge. i'm a big fan of steam, and i think it's a much better way to download and install games than using an installer program. however, it has a few downsides. you can't play games unless you buy them on steam. you can't play many of the games you buy on steam, unless you buy them through steam (which costs an extra \$15). if you don't have a credit card, you can't buy games through steam. however, if you buy a game that you download from steam, you have to purchase a game key to install the game, or the game will be deleted from your computer. to this day, i just love this daw. it feels so sturdy and professional. the interface is intuitive enough for beginners, but also fun enough for advanced users. it has all the features you need to work with and it comes with a nice collection of instruments, effects, and loops.

audacity is the best audio editor around. it has some major limitations, but it is the only free one that can edit mp3 and wav files at the same time. it is very easy to use and comes with all the free plugins that a professional needs. like everyone else i am not too impressed with waveeditor, but i am using it on a daily basis to edit some of my mp3 files.

most of the effects are pre-configured and integrated into the daws visual interface, including an insert and a compressor. the plug-ins are free to use, but a one-time payment of \$19 will unlock the full version of the software. the best free option for the audio industry is tidal, which allows users to enjoy higher quality audio for free. many people are being introduced to the format with the tidal hifi subscription, which offers access to 320kbps or higher quality audio to download. it allows users to hear what the top-tier tidal hifi subscription costs. sketchbook express is a free sketching and animation software that works across multiple platforms. you can export projects to video, audio, and even html5, and you can easily access the software from any device. sketchbook express is a great free option for artists, designers, and developers looking for a quick and easy way to make beautiful, unique, and mobile-friendly projects. reaktor is a free software synthesizer that is commonly used in electronic music production. it is available in both mac and pc versions, and its price varies depending on how many licenses you buy. it has more than 18 instruments, including the most widely used fm synthesis ones and delay effects. it also includes advanced modulation and editing tools. what about playing music? if youre looking to start your journey into the world of music production, youll be happy to know that there are many free daws available. garageband is a very simple, easy-to-use application that offers most of the essentials, such as a virtual keyboard, a metronome, and a mixer. it also includes easy-to-use editing tools to help you create music. 5ec8ef588b
