Native Instruments Traktor Pro 1.2.4 (PC - MAC).zip REPACK

traktor dj 2 looks and feels native on all platforms. however, the ios controls are easier to use, and gives you a better haptic feedback. which is a good thing. for example, the touchpad eq control looks like an iphone or ipod touch with its curvature, and the way you touch it to activate the effect is perfect. the keyboard section was also improved to give a better feel and the library section looks the same on all platforms, again for the better. traktor pro 1.2.4 is definitely a much needed update. as previously mentioned, the traktor library is identical on all platforms. if you have a large collection of music, then the traktor pro 2 library will be enough for you to dive into. where traktor dj gets you is by adding

tracks or a new format to your existing library. the traktor dj plus functionality opens up a world of possibilities for djs who can add tracks that can be used in the dj version of traktor dj 2. these can be found at any authorised universal music site. the same features remain in place, which is great. when you make tracks available to traktor dj 2, these become part of your traktor library, and can be tracked by the software just as if they were in your traktor pro collection. bpms for all of these tracks are updated as they are imported to traktor pro. all of the tracks are added as au plugins, and load automatically into traktor pro. equipment is being shared between these two dj applications now, so the way you save your cues on one dj application will work fine on the other. and like traktor pro, and traktor dj 2 are available to purchase separately. the main thing missing is being able to access your traktor pro music on traktor dj 2, or vice versa. unfortunately, this isnt something traktor dj 2 can compete with, and they arent concentrating too much on improving this feature. as a beginner traktor dj

2 is a better option if you have a large music collection, or you are looking for a way to share music between the dj and production sections of the software.
