Spherical Panorama Virtual Tour Builder Crack PC/Windows

Spherical Panorama Virtual Tour Builder for Windows is an ideal solution if you want to create professional-looking and fully interactive virtual tours with panoramic images. The software is bundled with a comprehensive set of features that will ensure you create tours of any size in just a few clicks, in a range of formats and on multiple platforms, including CD-ROM, DVD, website, Flash screen savers, and even standalone executable files that can be distributed to friends and colleagues. The application supports both cylindrical and spherical panoramas and various types of 3D objects can be placed on the background, such as still images, Flash animations, HTML pages, Java applets, videos, audio commentary, hotspots and more. Music can also be added to any presentation with the option to use MIDI or MP3 files, and you can even record your own voice while viewing the panorama. Use the Spherical Panorama Virtual Tour Builder to build virtual tours that can be viewed in the following ways: on your PC, on the Internet, and on mobile devices. It allows you to import content from your digital camera, from many popular image and video editing software applications, or directly from any Windows application that supports the JPEG format. Moreover, Spherical Panorama Virtual Tour Builder also lets you create a web page that you can upload to your website. With Spherical Panorama Virtual Tour Builder you can create virtual tours that provide users with useful navigation tools such as photo galleries, hotspots to link to relevant pages or areas of the panorama, and audio commentary. In addition, you can export your project in a wide variety of formats, including WAV, MP3, GIF, JPG and PCD, as well as compile it into a stand-alone executable or create a screen saver. There is a manual available for the program that offers step-by-step instructions on how to create a virtual tour with Spherical Panorama Virtual Tour Builder, as well as some additional useful tips and tricks. It supports a wide range of content and types of panoramas, and it is possible to link objects within the same presentation. The application has a powerful video editor, which enables you to create a movie from any set of still images. It supports many file formats, and it includes a powerful batch conversion tool to help you convert files in bulk. Spherical Panorama Virtual Tour Builder is an easy-to-use application that allows you to create professional-quality panoramas, and it also supports a range of options that will

Spherical Panorama Virtual Tour Builder License Key Full

Spherical Panorama Virtual Tour Builder Crack Keygen allows you to create high-quality virtual tours quickly and easily. Panorama content can be imported in various formats, and various objects can be inserted into the panoramas, such as still images, HTML pages, Flash animations, slideshow screens or movies. You can even add audio commentary to your panorama. You can also import panorama objects such as GIF, JPG, and PNG files. * Import objects: Insert panorama objects, such as JPG, GIF, PGM, PPM, TGA, SURF, ASF panoramas, panorama objects, and animated GIF files. * Add background music: Add background music in MIDI format. * Upload: Upload presentation file to the server. * Website creation: Generate HTML page of the virtual tour. * Compile: Compile tour into executable file. * Hardware support: Export panoramas to a real panorama. * Exporter format: Exporter panoramas to standard formats for virtual reality. * Add hotspots: Support hotspot. * Audio commentary: Record audio commentary. * Data import: Import various formats of data file. * Log: Store log of the creation of a virtual tour. * Bonus: Generate all panorama formats at once (in one project) using the same template. * Live thumbnail preview: Thumbnails automatically update as you scroll through the panorama. * Thumbnails list: Thumbnails list for individual panoramas. * Thumbnails Manager: Thumbnails manager for panoramas. * Hotkeys: You can customize the keys used for panorama navigation. * Preferences: You can set your preferred options for panorama navigation and insert objects into panoramas. * Colorization: You can change the color of panorama objects. * View: You can use multiple panoramas in a one project. * 360 VR: It is possible to render a panorama to a cylindrical projection. * Export standard files: Export to 360 VR, 2edc1e01e8

----- Keep Your Eyeballs on the Trail With Realistic Peripheral Display, Eye-tracking & a Professional Stereoscopic Panorama Viewer, it's Now Possible to View 360-Degree Panoramas and Other Content on any Computer San Francisco, CA - December 17, 2011 - EyeTribe Technologies today announced its second-generation Eyefinity multi-display technology for the Windows® operating system platform, bringing the total of available displays to eight, plus a hot-plug feature that enables simultaneous display of two displays on a notebook computer. The new software addresses the need to view panoramic content, and allows desktop browsing with an interactive navigation bar that helps facilitate the transfer of knowledge. The interface is designed for educational environments, and also works for both streaming and local content. In addition, the panoramic viewer that comes with the technology is the first to display spherical content with horizontal and vertical stereo in one view, plus a second, higher-quality view that can be used for in-depth interpretation of content. The display combines EyeTribe's proprietary eye-tracking technology with 3D hardware that is certified for NVIDIA® Optimus® technology. "We are proud to offer the next generation of Eyefinity and Eye-tracking technology," said Bruce Bilous, CEO of EyeTribe Technologies. "Not only can we address the need to display panoramic content, but now users can also view it in a professional stereoscopic way. We are very pleased to be able to work with NVIDIA to help deliver the high quality content to users of our EyeTribe technology." EyeTribe also today launched a new website to celebrate the launch of the technology. "EyeTribe's unique panoramic technology is one of the most immersive ways to present content," said Christopher Heintz, director of product management at NVIDIA. "This technology is an important step forward and a testament to NVIDIA's commitment to supporting education and STEM programming through our Optimus® technology." About EyeTribe Technologies EyeTribe Technologies has developed a 3D, immersive, eye-tracking, multi-display technology for the Windows operating system platform. The technology is bundled with a panoramic viewing app, written by the same team that developed the panoramic viewing app for Google Earth. The 3D panoramic app combines eye
